

How To Make Every Day a Payday

Same-day pay is catching on with employees. Facing mounting debt, 75% of U.S. workers want to get paid every day. With workers struggling to meet expenses, early access to pay can provide some much-needed support to workers who live paycheck-to-paycheck. For many workers, this idea of daily pay couldn't have come at a better time.

Financial technology companies like **Clair** are enhancing the way workers get their money. **Clair Pay on Demand** is an alternative to weekly, bi-weekly, and monthly pay cycles. Employees can get access to a portion of their paycheck using Employee Self Service without waiting for payday.

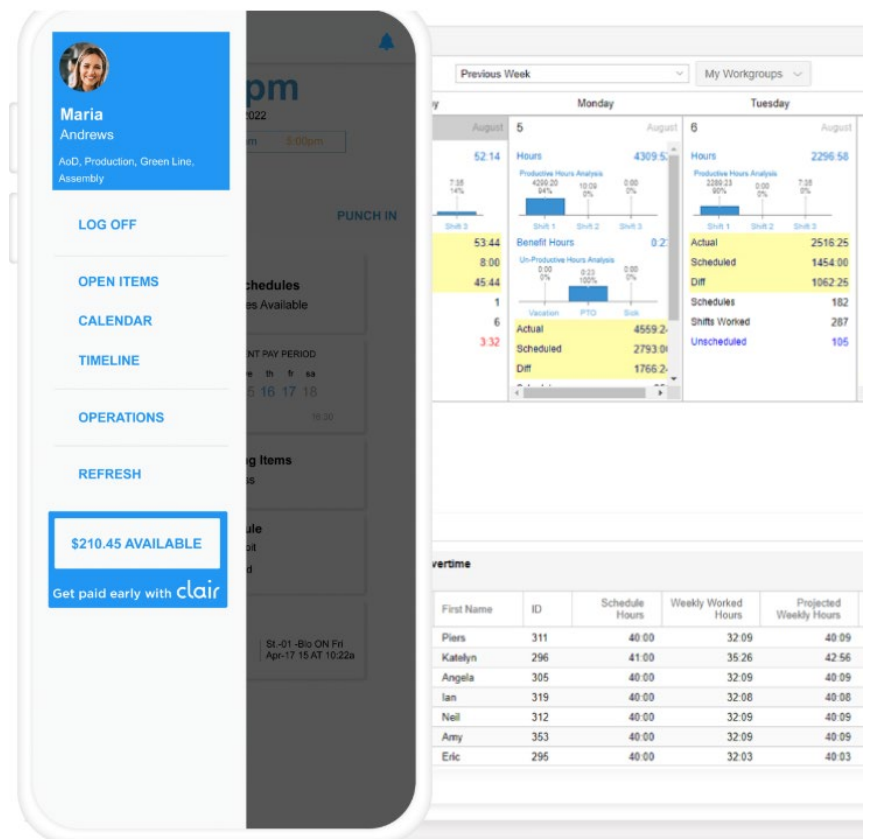

With Attendance on Demand, Clair is embedded in your AoD Employee Self Service mobile app.

Clair is FREE to both our clients and their employees!

No changes to employer's payroll and cash flow.

(U.S. based emp's only)

Clair Pay on Demand is **NOT** a loan or a payday loan. Employees are simply transferring their earned pay to their bank account or card. They can only transfer money that they have already earned but has not yet been paid to them.
