

IntegriTime Solutions Introduces Industry First Facial Recognition Timeclock for Attendance Enterprise and Attendance on Demand Clients!

Look-And-Go Technology Facial Recognition for Workforce Management

The newly integrated SY-910, is an advanced and aesthetically appealing solution requiring no physical contact for look-and-go time and attendance management, as well as access control.

SY-910 terminals use Dual Infrared Sensor Technology to identify users and cannot be fooled by two-dimensional imagery, twins and more.

Cloud-based, open source (Linux, Java app) for additional stability - no middleware required.

SY-910 Specifications

Verification methods	Face, PIN & Face, Card & Face, Card, Card & Photo
Screen size	3.5" TFT color screen
Host communications	Ethernet (TCP/IP), USB port, WiFi
Power requirements	12V DC
Keypad	Numeric keypad & function keys
